WORK EXPERIENCE

Frokify Desktop Application

<https://github.com/khadijaaslam01/frokify-app>

- Frokify is a desktop web application that serves as a recipe-search platform.
- Users can easily search for a wide variety of recipes by entering keywords in the search bar.
- The app displays an extensive collection of recipes with images and detailed instructions for each dish.
- Additionally, Forkify allows users to save their favorite recipes for future reference by creating an account and logging in.

Bankist Application

<https://github.com/khadijaaslam01/bankist>

- It appears to be a web-based banking application hosted on Vercel.
- The app features a modern and intuitive user interface for easy navigation.
- Users can likely perform typical banking tasks such as checking account balances, making transactions, and managing their finances.

SKY IT SERVICES

<https://github.com/khadijaaslam01/sky-it-services>

- Sky IT Services is a website for an IT company that offers a range of services related to technology and web development.
- The website features a modern and visually appealing design, incorporating a combination of bold colors and clear typography.
- The site showcases the company's expertise, highlighting their services, portfolio, and contact information to attract potential clients and showcase their capabilities in the IT industry.
